manual template.

Title page 1

Use this page to introduce the product

by Perfection Tools Software

This is "Title Page 1" - you may use this page to introduce your product, show title, author, copyright, company logos, etc.

This page intentionally starts on an odd page, so that it is on the right half of an open book from the readers point of view. This is the reason why the previous page was blank (the previous page is the back side of the cover)

Easy window & system tray icons hider Help Topics

Printed: 2008   in (whereever you are located)

Special thanks to:

All the people who contributed to this document, to mum and dad and grandpa, to my sisters and brothers and mothers in law, to our secretary Kathrin, to the graphic artist who created this great product logo on the cover page (sorry, don't remember your name at the moment but you did a great work), to the pizza service down the street (your daily Capricciosas saved our lives), to the copy shop where this document will be duplicated, and and and...

Last not least, we want to thank EC Software who wrote this great help tool called HELP & MANUAL which printed this document.

1   General Information

1.1   Introduction

Easy Window & System Tray Icons Hider enables you to hide any window in the taskbar or to hide any icon in the system tray.

How many times someone came when you do some work on your computer in which you don't want anyone to see ??

Well, What will you do in such a situation??

You may close the program's window or you may minimize it . If you close the program then you will need to open the program again, and if you minimize the program's window, it is still in the taskbar.

So how can we we solve this problem?

We can solve this problem by hiding the program's window instead of closing or minimizing it to the taskbar or sending it to the system tray.

And that's what **Easy Window & System Tray Icons Hider** can do for you. Just with a shortcut key, you can hide any window in the Taskbar
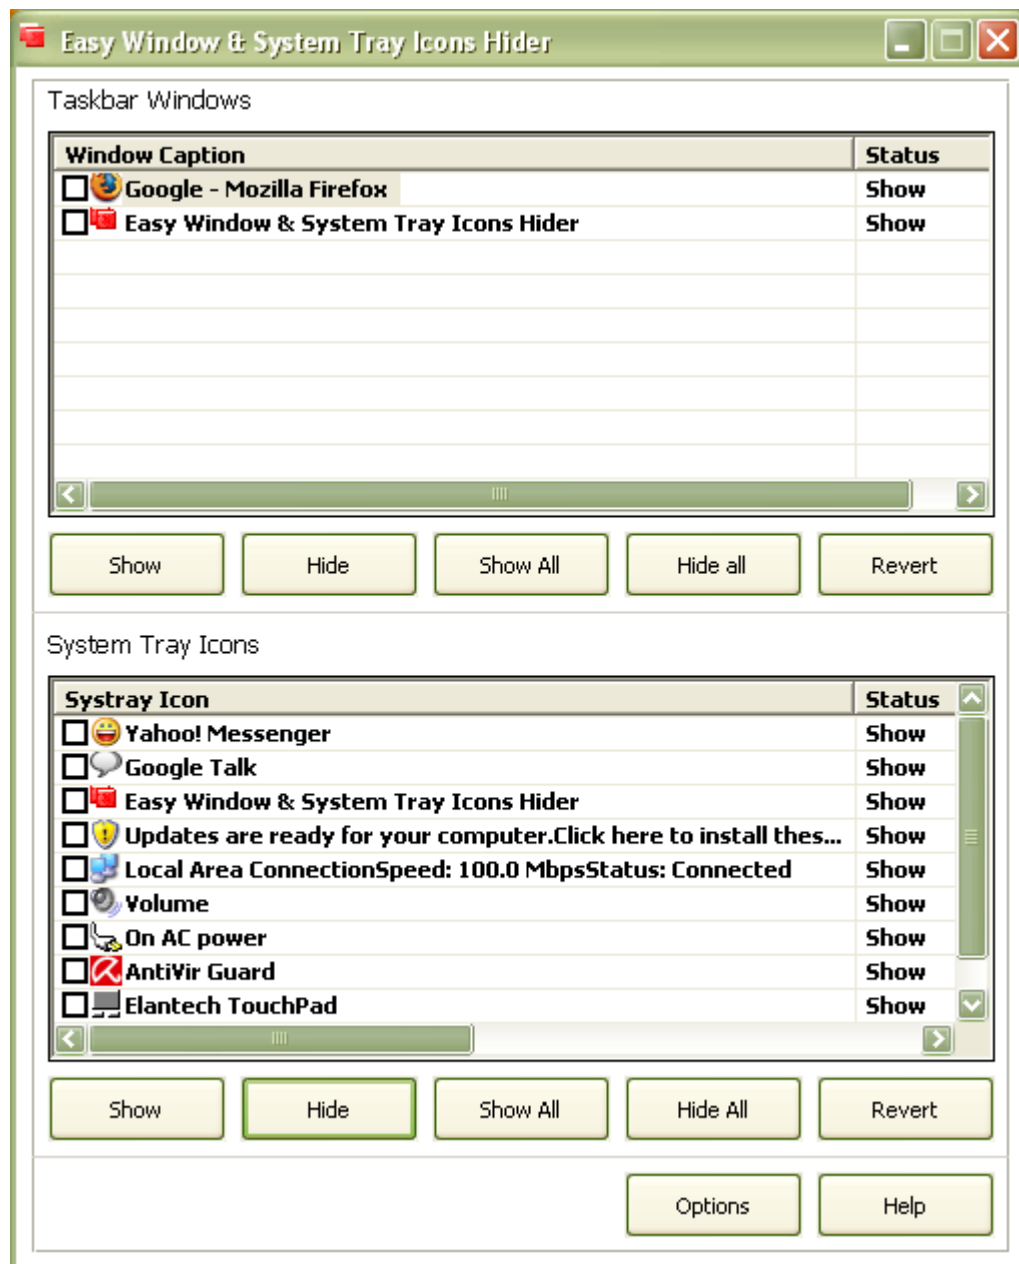

Another case:

You have about ten windows opened in the taskbar and now the taskbar is flooded with windows. In this case you can use **Easy Window & System Tray Icons Hider** to hide windows instead of closing them.

Another case:

You have a lot of icons in the system tray area, In this case you can use **Easy Window & System Tray Icons Hider** to hide a specified icon or even all the icons in the system tray area.

1.2 Features

- Hide any window either from Easy Window & System Tray Icons Hider itself or using a shortcut key.
- Hide all displayed windows either from Easy Window & System Tray Icons Hider or using a shortcut key.
- Hide any or all icons in system tray area.
- The ability to customize shortcut keys.
- Hide the Foreground window using a shortcut key.
- Revert the State of windows or system tray icons between show and hide.
- Easy Window & System Tray Icons Hider remembers the hidden windows if you close and re-open it.
- Easy Window & System Tray Icons Hider remembers the hidden system tray icon if you close and re-open it.
